PLANT-BASED OIL INGREDIENTS FOR SUSTAINABLE PRODUCTS

PEOPLE | PLANET | PROSPERITY

WE STRIVE TO MINIMISE OUR CARBON FOOTPRINT AND PROTECT BIODIVERSITY IN OUR LANDSCAPES.

Sime Darby Oils plays a leading role in the development and promotion of sustainable practices in the palm oil sector. We seek to advance the production, procurement and use of sustainable oil palm products.

We also strive to minimise our carbon footprint, protect biodiversity in our landscapes and ensure responsible waste and water management.

No deforestation and no development on peatland

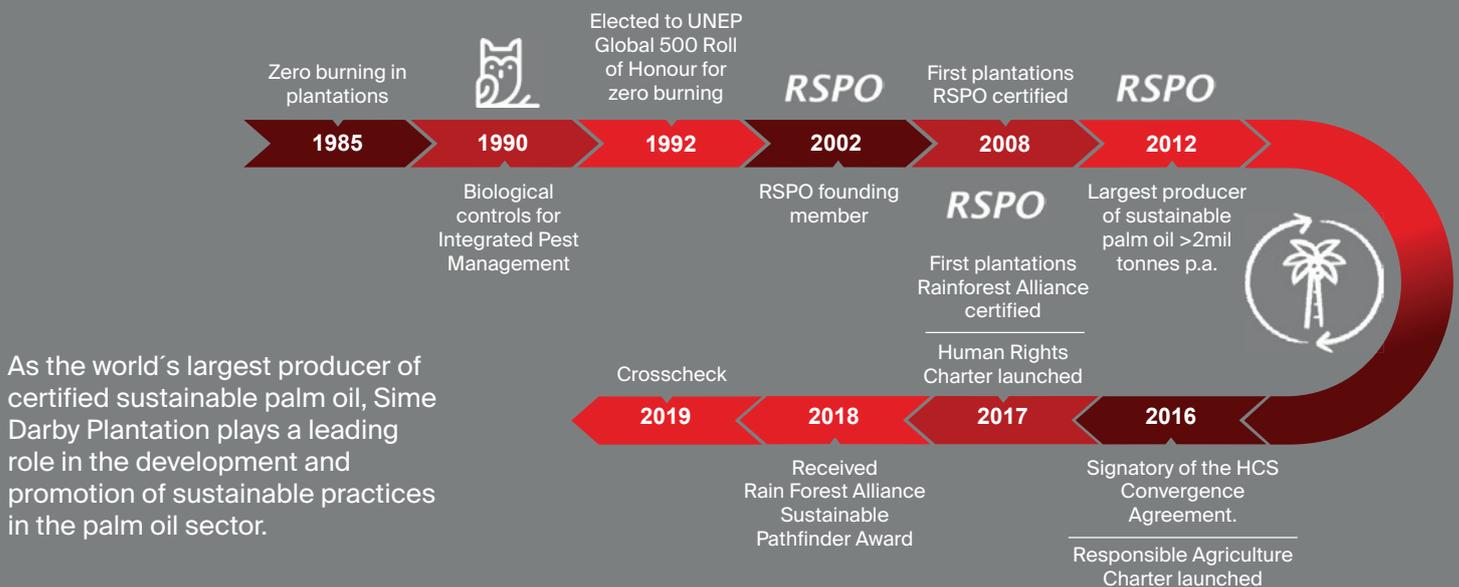

Understanding where our supplies come from is a key element to help halt deforestation. The solution we offer is an online tool called Crosscheck. This allows us to trace supplies back to source, making it possible to identify where problems exist - and take action.

We recognize the necessity of balancing the expectations of a wide range of stakeholders in the way that we implement responsible agricultural practices. Everything that we do around sustainability is in line with the sustainable development goals 2030 and is guided by our sustainability purpose.

Our Sustainability Purpose

OUR SUSTAINABILITY JOURNEY
